# Be ready with the versatility to provide effective care.

## The TotalCare® Bariatric Plus Bed

Hill-Rom

Enhancing outcomes for patients and their caregivers.

# *Are you ready?*

According to the World Health Organization's obesity and overweight fact sheet, 500 million adults, 20 and over, are classified as obese.[1] Health care providers must be ready today to provide care for patients of size.

With unmatched versatility designed to keep patients comfortable and confident, the TotalCare® Bariatric Plus Bed helps you be ready to provide effective care.

### *Safe skin at any level of acuity*

Keeping bariatric patients' skin healthy throughout their recovery is one of your highest priorities. Be ready to achieve your goals and go beyond standard care with surfaces that address pressure, shear, friction and moisture—the four main causes of pressure ulcers.

**PREVENT**
FlexAfoot™ retractable foot mechanism makes it easy for you to adjust the overall length of the bed according to a patient's height to help prevent them from sliding down in bed and minimizes the need for repositioning.

**PROTECT**
Advanced Microclimate® technology helps reduce heat and moisture at the surface, keeping the patient's skin cool and dry to help protect against skin breakdown.

**TREAT**
Pressure redistribution surface automatically adjusts to a patient's weight, body type and movement in both bed and FullChair® positioning to aid in the treatment and prevention of pressure ulcers.

***TotalCare® Bariatric Plus Bed's attractive design delivers personalized care while maintaining patient dignity.***

## *Ease of use at every point-of-care*

Whether you're transporting patients or performing routine care, doing your job efficiently while also comfortably supporting your patient isn't easy.

Be ready to do more on your own with a range of features that help you turn, transport and reposition patients with a touch of a button — every step of the way.

- IntelliDrive® Powered Transport allows a single caregiver to easily transport a patient in bed
- Turn Assist helps you turn a patient, making it easier to perform linen changes or other routine tasks
- A large, colorful touch screen offers control of functionality, such as bed exit, integrated scale or head-of-bed alarms — all at a touch of a button

## *Easy patient handling: the Progressive Mobility® Program*

Getting your patients moving and independent is one of the most challenging tasks you face. The Progressive Mobility® Program is a simple and gradual step-by-step process that helps progress patients from lying in bed, to sitting up, to standing — without compromising their comfort or dignity.

**BREATHE**
Head-of-bed and early Continuous Lateral Rotation Therapy

**TILT**
The tilt table position gradually acclimates patients to the upright position

**SIT**
The FullChair® position allows a single caregiver to more easily comply with an upright mobility protocol with the simple press of a button

**STAND**
Chair egress and lifts permit safe and easy patient egress from the front

**MOVE**
Patient lifts enable safe weight bearing exercise and/or walking support

# *Be ready with Hill-Rom.*

The TotalCare® Bariatric Plus Bed is more than a smart investment — it helps form a deeper connection with a dedicated long-term partner. We're committed to helping patients and caregivers at every point-of-care, and our TotalCare® Bariatric Plus Bed is another great example.
