Ritter 391 Otolaryngology Chair

The Ritter 391 Otolaryngology Chair was designed specifically with the otolaryngologist in mind. That's because it offers a unique, thin back section allowing you to get in extra close and a magnetic headrest, which easily adjusts to position each patient precisely and effortlessly. For added convenience, controls which move the seat and back sections are located on both sides of the chair.

Those physicians who prefer to work with their patient in a favorite position every time, will appreciate the one adjustable memory position of the Ritter 391. Its design allows you to automatically power the chair to your favorite position. Once in position, the 391 offers the ability to rotate 360 degrees to give complete access to your patient.

Optional double articulating headrest

When the exam is finished, it takes just one touch to return the chair to a seated position.

To meet the needs of your patients, the Ritter 391 features armrests that move up and out of the way making it easier for them to get in and out of the chair. And, they will appreciate the comfort of its contoured back section. With its removable upholstery and optional articulating headrest, we're sure you'll agree the 391 is the perfect chair for all your healthcare needs.

The Ritter 391. It's dependable...it's quality...it's a Ritter.
